2. You will be asked to allow the app to make changes. Click "Yes". Then a Solidworks installation manager window opens. Check "Individual (on this computer)" option and click "Next".
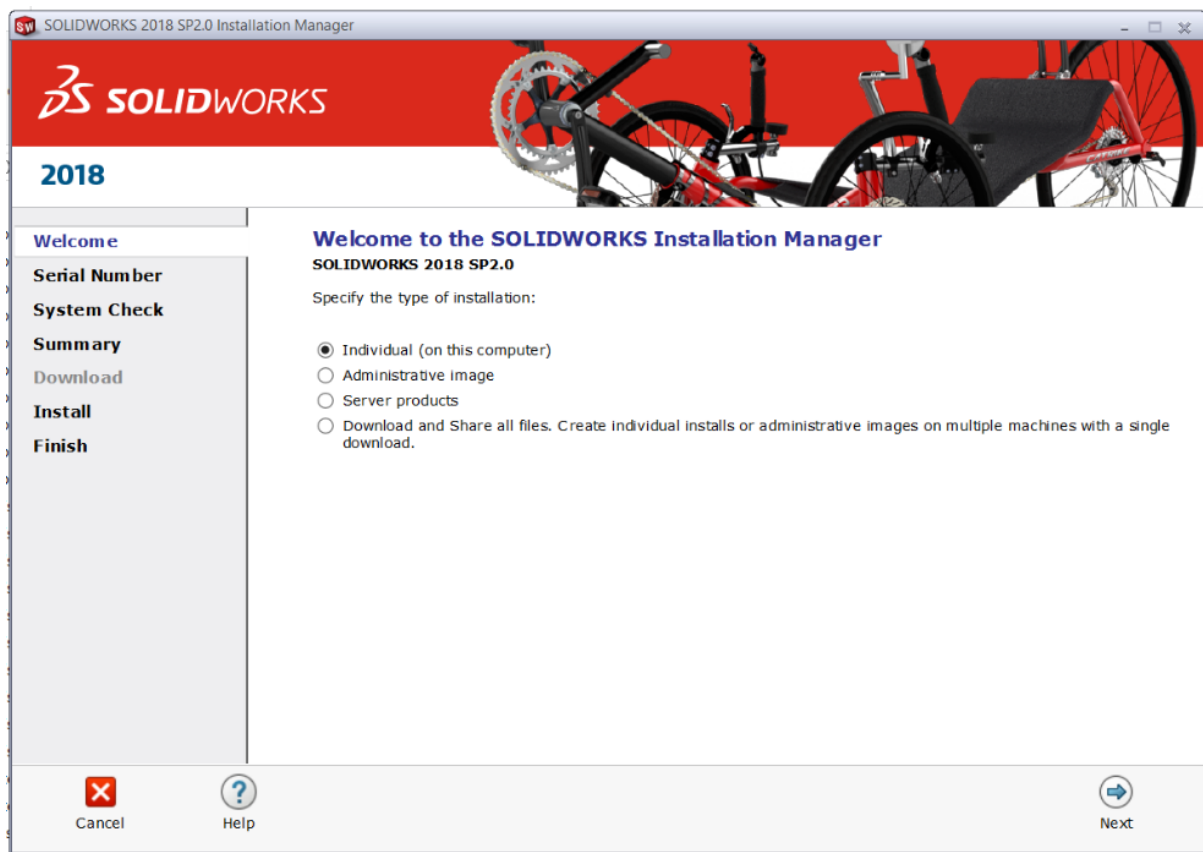

3. You'll be asked to enter a serial number. The key is as follows :
9710-0143-8853-2326-G77F-7825

Click next after entering the serial number.

4. You'll be shown that there's a newer version of Solidworks. But check "No, I'd like to continue installing Solidworks 2018 SP2.0". Then click "Next".
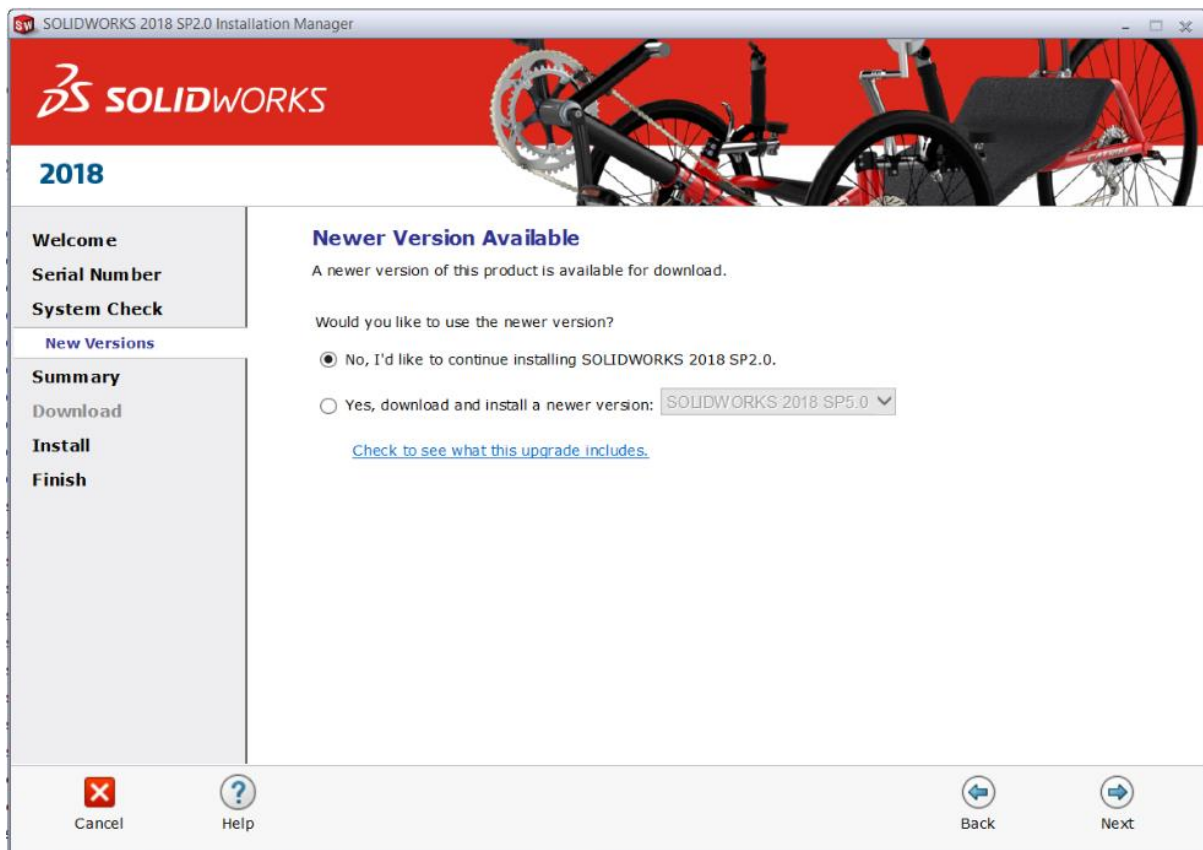

5. Now, check "I accept the terms of the SOLIDWORKS". Then click "Install Now".
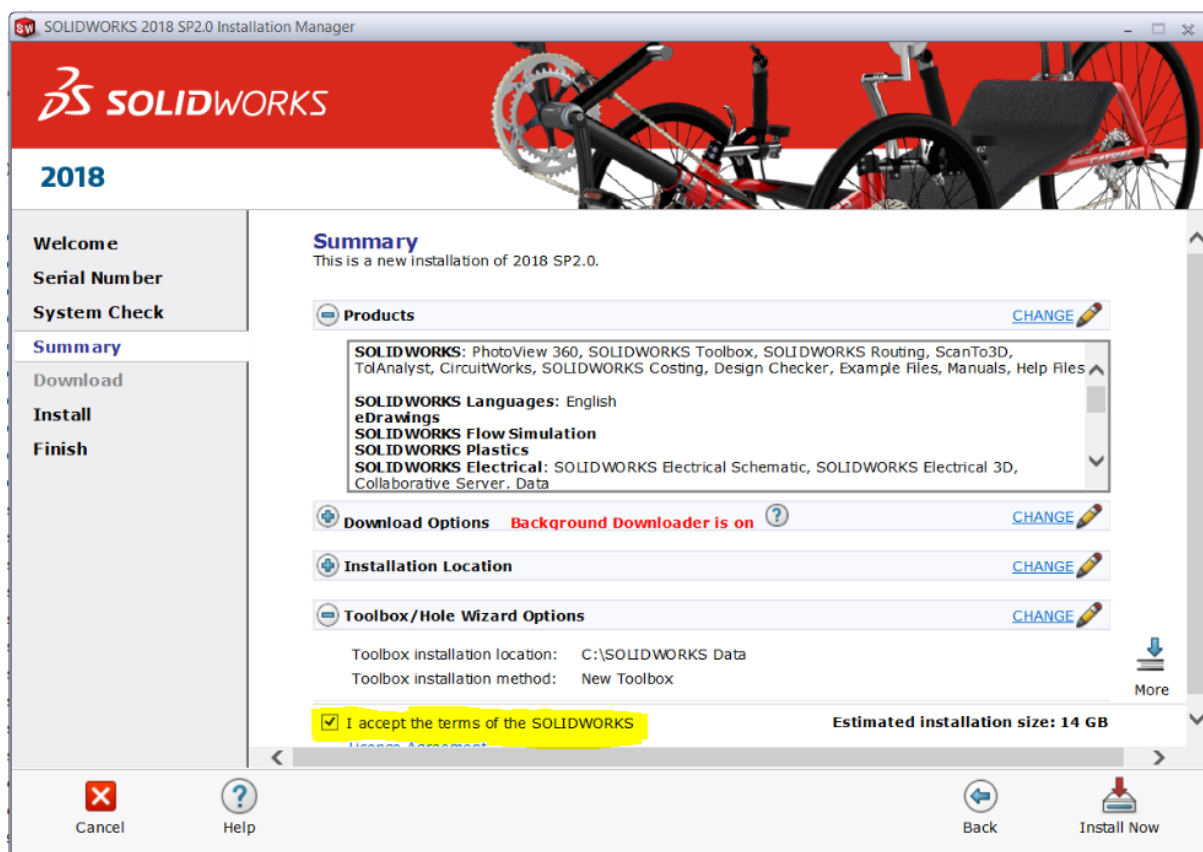

6. You get a **Solidworks Installation Manager** pop-up. Enter the following : **25734@10.250.1.62** . Click "OK".
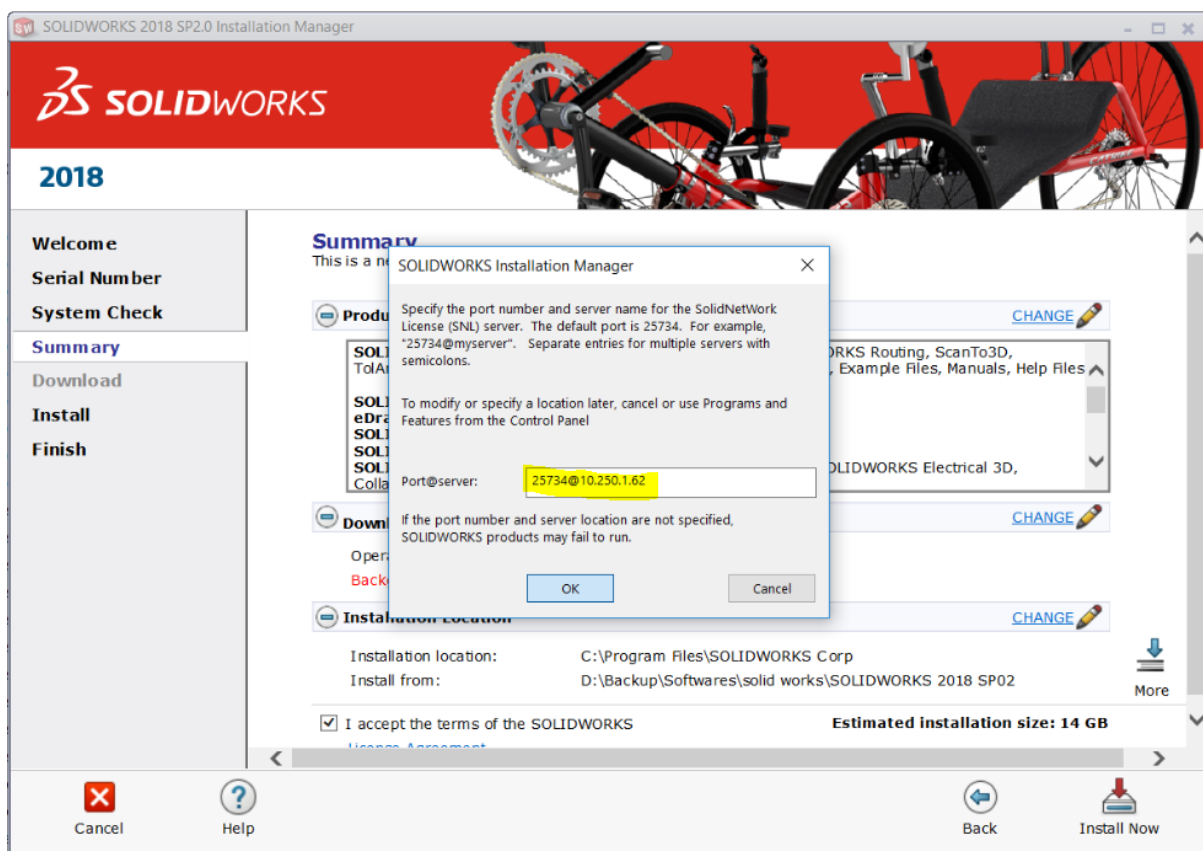

7. The installation starts. It generally takes a few minutes to install (around 30-45 minutes). Do not let your laptop/PC go to sleep during the installation.
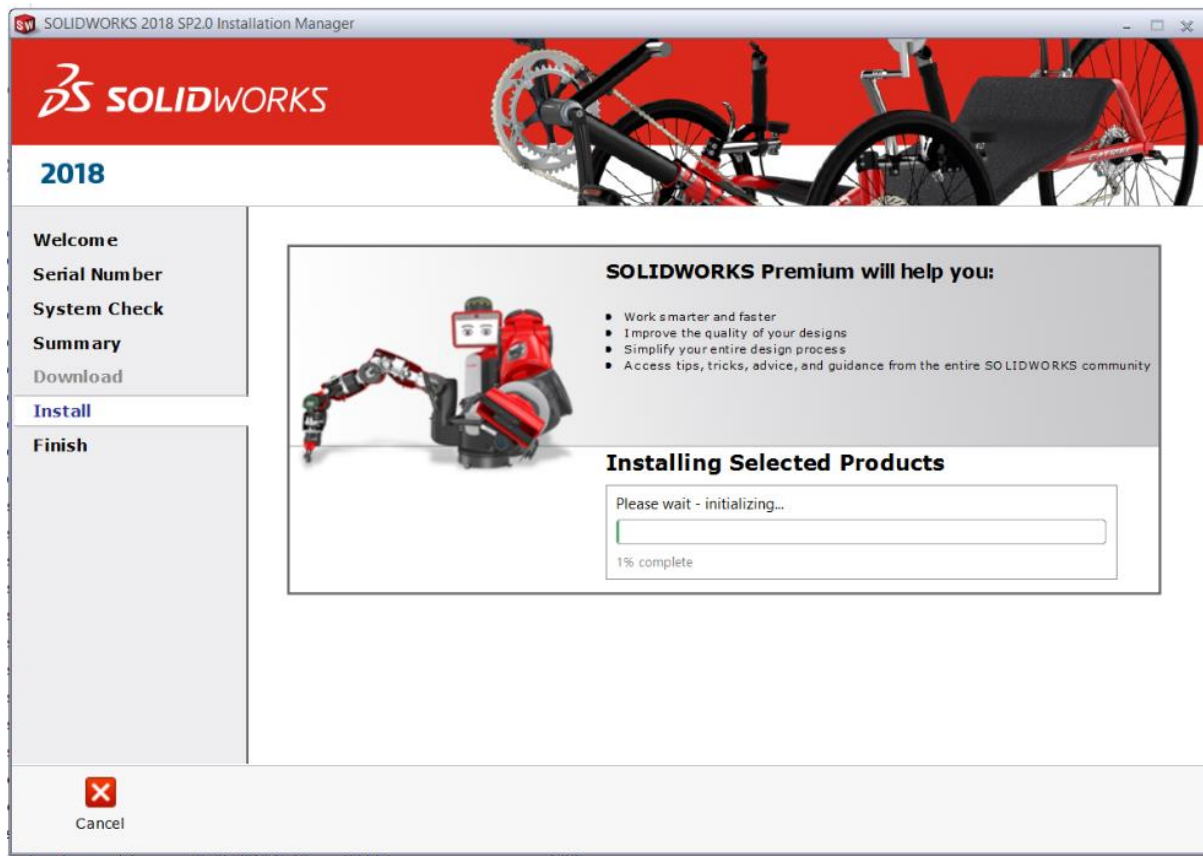

8. Once the installation is complete, you can check or uncheck "What's new in SOLIDWORKS 2018". Also, you can check either of the 3 options for the Experience Improvement Programme. Then click "Finish".
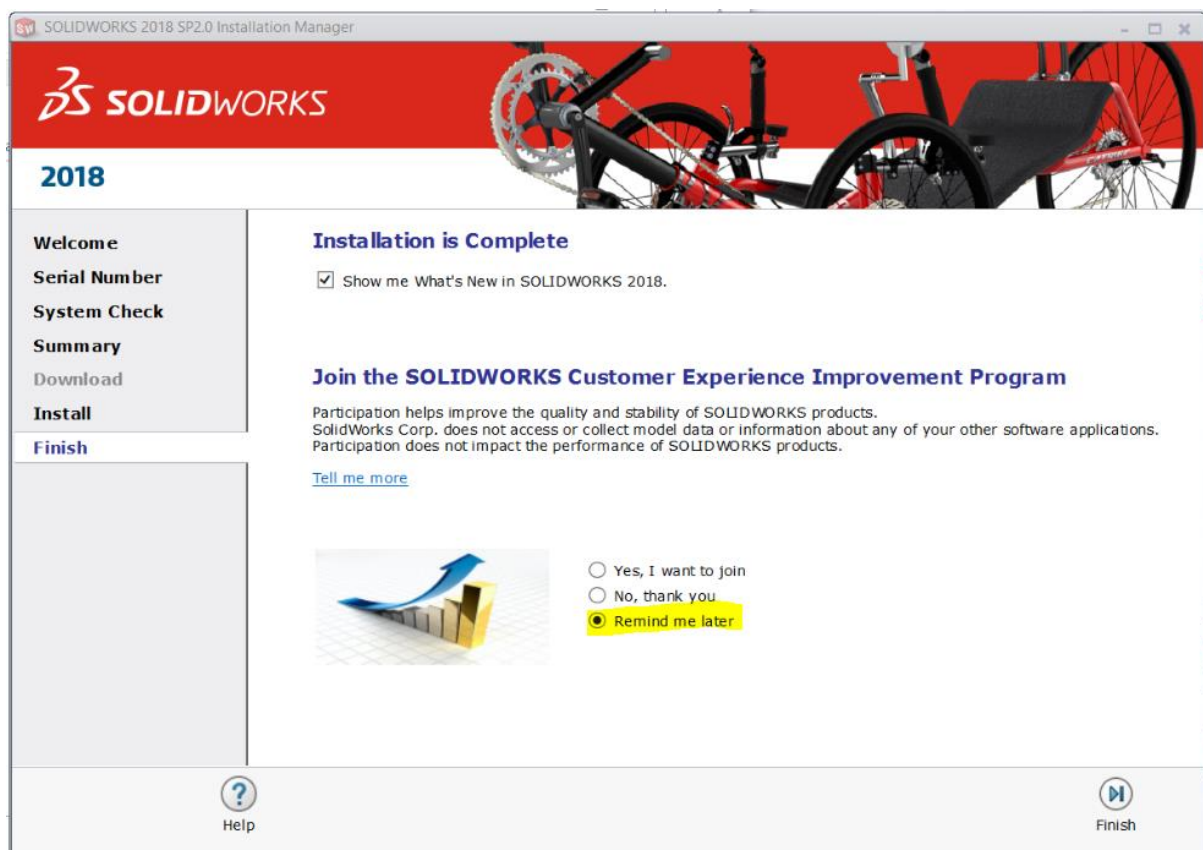

9. You may take a look at the Desktop. A few shortcuts will be created. Open **SOLIDWORKS 2018**.

10. You get a small window which initiates the launch. You may have to wait for a while for the application to open. (How much time? Depends on your RAM and your Processor speed)

11. You'll now see the app open and a Welcome window. Select "Part" and start exploring all the various options available.

NOTE: Sometimes, you may not be able to directly able to proceed to step 11. In case you have a problem, please make sure that the 2nd PC in the first row (The one that says "DO NOT TURN OFF THIS PC, IT IS A SERVER FOR SOLIDWORKS") in the CS lab (Room 24) is turned on (not even in sleep) and try running the SOLIDWORKS 2018 app on your laptop/PC again. This PC in the CS lab is the server for SOLIDWORKS 2018 in our college. Also remember that this application runs only when you are connected to an in-campus active internet connection.
